About Fisher House

The Fisher House™ program is a unique private-public partnership that supports America's military in their time of need. Because members of the military and their families are stationed worldwide and must often travel great distances for specialized

medical care, Fisher House™ Foundation donates "comfort homes," built on the grounds of major military and VA medical centers. These homes enable family members to be close to a loved one at the most stressful times - during the hospitalization for an unexpected illness, disease, or injury. There is at least one Fisher House™ at every major military medical center to assist families in need and to ensure that they are provided with the comforts of home in a supportive environment. Annually, the Fisher House™ program helps 12,000 families and has made more than three million days of lodging available to family members since it originated in 1990.
